## Base Radio HX-DU8602T

Harxon radio modems provide reliable data communications for mission-critical applications where a combination of stability, supreme performance and long range are required.

HX-DU8602T is a high speed, high power, wireless data link built to survive the rigors of GNSS/RTK surveying and precise positioning. This radio's 25W of power maximize range, enabling you to work in difficult urban areas. The HX-DU8602T is equipped with digital tube, LED and keypad, used to indicate the current operating status, as well as for changing the operating channel and power level of the radio modem. For the most rugged and reliable long-range data link, go with the Geomatics industry's new standard in wireless communications HX-DU8602T.
